NOT RIPE FOR ORGANIC UNION.

Representatives of Presbyt-rian and Reformed Bodies Discuss Matter. Philadelphia, March 19.—A feeling that the time is not yet ripe for organic union of the seven church bodies represented in the Council of Reformed Churches in America, holding the Presbyterian system, was voiced by virtually all the speakers at to-day's session of the council here. A number of ministers from different parts of the country took part in the discussion of the overture looking to organic union, which, if effected would bring into me body all the Presbyterian and returned churches of the country, with a total membership of about 3,000,000. After a lengthy discussion a resolution was adopted providing for the appointment of a committee "to give careful and full attention to the whole subject of closer relations and more effective administrative co-operation between the several Presbyterian and reference to both home and foreign mission fields."

Colonel James Hopes to Secure

[Special to The Times-Dispatch.]

Lexington, Va., March 19 .-- In antici-

Virginia a regiment, the officers of which are all to be graduates of the

ing with V. M. It men of influence in most of the cities and towns of the State requesting them to recruit their companies at once up to war strength if possible. It is hoped to raise two companies in Richmond, where there are a great many graduates of the institute. Colonel James expects further to raise one company in Petersburg, two in Lyachburg, one in Culpeper, one in Norfolk, one in Lexington, one in Winchester, one in Hampton, one in Stanton, one in Toshville and one in Stanton, one in Janville and one in Stanton, one in Janville and first sergeants, the battallon commanders and their staffs probably will be selected from among the older and more experienced graduates of the veste.

talion commanders and their staffs probably will be selected from among the older and more experienced graduates of the institute. If he can obtain permission from the War bepartment, Colonel James will command the regiment himself. He has not yet selected the regimental staff.

With the exception of the United States Military Academy, the institute in the Mexican War furnished the largest number of officers of any other institution in the country. Furning the Civil War most of its graduates, of course, fought on the side of the South, although there were a number of old cadets among the officers on the Northern side. In the Spanish-American War, aside from West Point, V. M. I. again stood in the front rank with more officers in the regular army and among the volunteers than any other school in the land. It is possible that at any time the call to arms may come and when it does the graduates of the West Point of the South expect to be ready to answer "Here."

Any and all aimms of the institute who are interested in organizing this regiment to be known as the V. M. I. Reserves should correspond at once with Colonel Russel James.

Our power is the "Ready-to-Use" kind-always readyand with a motor on each machine, you use only what is required to perform the work going through,

You use the current just as you want it, like cutting strings from a ball of twine. Why not use it instead of making your own power, where you must make a great deal more than you use, even when not doing any work, and often cannot produce enough to furnish all your machines their

We furnish it "ready-to-use," and that means all of the trouble is eliminated when it reaches you. Can you make power without trouble

We can deliver it at your factory cheaper than you can make it. Let us make an engineering report of the cost and possibilities of using our power ..
